AdultWebware features descriptions

TABLE OF CONTENTS

Enhanced skins support

- Changeable skins via admin area or via members area
- Your design could be integrated in 20 minutes
- Advanced templates language for power users
- Ready-made fast-to-use php files as an option
- You can also get pre-developed skins at a fraction of cost
- Just ANY paysite/avs/freesite/other could be integrated (open structure)

Changeable skins via admin area or via members area

You can change design templates in your Admin Panel ›› Local settings ›› Skins manually. Or, you can send your members directly to an URL like this:

Index.php?skin=yourskinname

Where yourskinname is your skin name which is uploaded and active in your adultwebware/templates/ directory (previewable in Admin Panel ›› Local settings ›› Skins)

Your design could be integrated in 20 minutes

You can integrate your design with AdultWebware for 20 minutes. Just follow the steps in the templates integration guide/tutorial which you can find in the tutorials section here:

http://www.adultwebware.com/go/tutorials/

Advanced templates language for power users

More than 60+ functions and 300+ variables are available for power users. There are no programming skills required to build power templates. All you need to know is an advanced html knowledge. And the will to create.

You can use ANY 3d-party PHP/other script/software with AdultWebware.

Ready-made fast-to-use php files as an option

You can find pre-developed ready-to go php files which you can use instead of using standard template structure (index.php with .tpl files).

You can also get pre-developed skins at a fraction of cost

Save HUGE with pre-developed professionally designed and already integrated design templates.

http://www.adultwebware.com/go/designs/

Just ANY paysite/avs/freesite/other could be integrated (open structure)

Open templates structure allows you use ANY 3d party script/software on ANY language. You can integrate it the way you want. You can use ANY php syntax. You can do whatever you want. PLUS, use built-in AdultWebware templates features and functions.

The AdultWebware has initially built for Paysite Automation. But you can also use it for any other task automation such as AVS/Free Sites or any other you may think of.

Any 3d-party scripts could work well with AdultWebware. Example integration with vBulletin (recent messages are shown in the box):
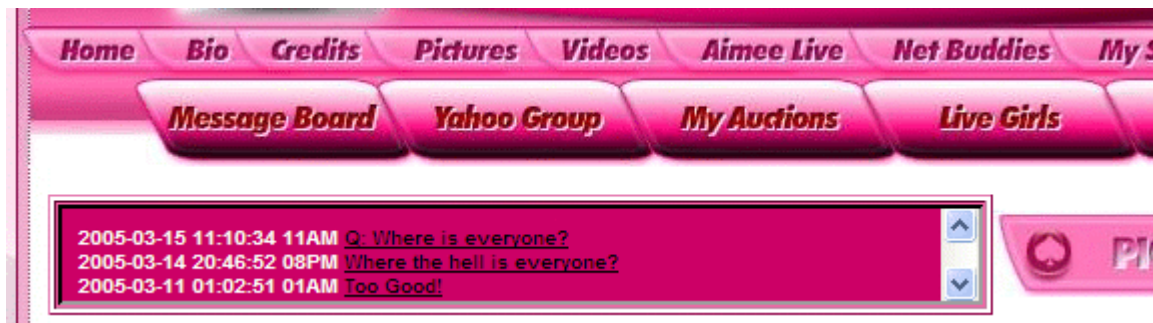

Our highly trained specialists would be more than happy to integrate AdultWebware with your design of any type. Please contact AdultWebware support at your personal V.I.P. area here:

http://vip.adultwebware.com/

Or use the following link:

http://www.adultwebware.com/go/integrate/

Comfortable & powerful content view

- View content by categories, by pages
- Show current content statistics + amount of views
- Show path to currently viewed content galleries
- Show back + forward links to previous + next galleries
- Sort content by views, date, name, reverse date
- Show pictures in different sizes
- Corresponding pictures/movies are linked to each other
- Slideshow, zip download option
- Multiple languages support

View content by categories, by pages

Viewing content never been that easy and powerful to members as it is with AdultWebware. Content galleries are shown in pages. You can change amount of items per gallery/category in your Admin Panel ›› Local settings ›› Galleries.
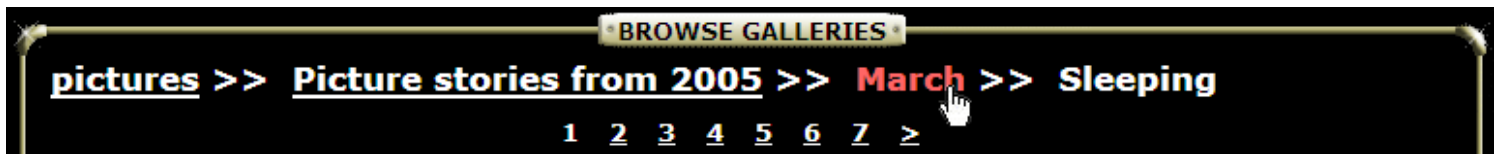

Example:

Show current content statistics + amount of views

You can also show current content statistics and amount of views to your members:

STATS

Last Update: 15-Mar-05

Total Pictures: 28.557
Total Movies: 587
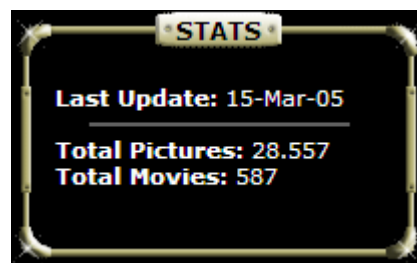

Show path to currently viewed content galleries

Easy browsing with complete path to currently viewed element:

Show back + forward links to previous + next galleries

While browsing a gallery, NEXT and PREVIOUS links are shown to lead directly to the next/previous gallery/category accordingly. That simplifies gallery browsing since user shouldn't go back first to see next gallery/category.

Sort content by views, date, name, reverse date

Users can sort galleries and categories by views, date, name, or reverse date (latest updates are shown on top). User just needs to pick a desired sorting method from the drop-down menu like this:
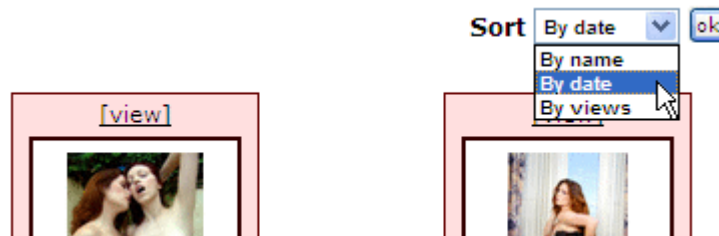

You can change default sorting method per each site in local settings menu.

Show pictures in different sizes

For a better performance (dialup users, personal browsing choices, etc), user can view content in different sizes. He just need to pick desirable content size from the list. That list is set in the main settings -> galleries menu (additional content sizes).

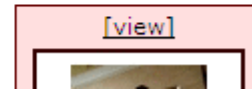

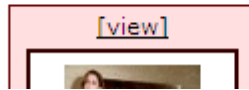

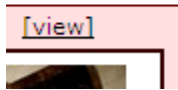

This would look like this:

pictures >> Red_Lace_1

1 ② ➡

Select content size to view Standard ☑ ok

Standard
640
800

Run SlideShow for this category

[view]   [view]   [view]

After making a selection, a cookie will be paced to remember user's preference.

ATTENTION: Make sure you have created additional content sizes from your awpanel -> galleries menu first. Otherwise, users will get 404 images instead.

Corresponding pictures/movies are linked to each other

If a picture gallery is attached to a movie gallery, a link "show pictures for this movie" will be shown to users (while browsing the movie gallery). Clicking this link will lead a member to the appropriate pictures gallery. In the pictures gallery, user will see a link to the attached movie.

Useful for huge sites to extend users' experience (show screenshots for movies, corresponding sets etc). A must have feature for any video sites. You can customize design template the way you need.

Slideshow, zip download option

Each gallery has a link to "slideshow". That shows pictures one by one in the eye-catching slideshow.

Clicking "Zip download" link inside any gallery, user will get complete gallery downloaded In a zip file.

Multiple languages support

Your users can pick a language they want. General interface elements will be shown in the language selected. You can edit the language files anytime.

Advanced video content (video sites)

- Show video content with multiple screenshots per movie
- Direct link to "view pictures in this set" (attached photos)
- Movie description, direct links to movie files from gallery
- Option to view movies embedded in a browser window
- Different download speeds per movie in multiple formats
- Show link to a preview movie per each movie set
- Show movies by scenes, unlimited screenshots, sizes/speeds per scene

Show video content with multiple screenshots per movie

You can show video content with multiple screenshots per each movie. So your members would have a better idea of what is the movie about.

Direct link to "view pictures in this set" (attached photos)

As mentioned earlier, you can attach any pictures set to any movie to provide internal linking between them. That would allow members to see corresponding pictures set per movie, for example.

Movie description, direct links to movie files from gallery

You can specify a description per each movie. That could be shown right in the galleries list view along with direct links to download.

Option to view movies embedded in a browser window

Your members can not only download movies, but also view them embedded in their browser window. You can define a preferred mode in templates.

Example:

In this example user can click a thumbnail image to view movie embedded into the browser, or "Click here to Download Movie" to download.

Different download speeds per movie in multiple formats

You can let members download movies in multiple formats and multiple file sizes per movie.

Show link to a preview movie per each movie set

You can also upload a preview movie per each set so users could download them.

Few examples of some members area video interfaces are shown below.

RATING: ★★★★★

Show movies by scenes, unlimited screenshots, sizes/speeds per scene

So-called "enhanced movies" mode allows you to provide the widest choice of videos for users to preview & download.

Each movie may have unlimited scenes. Unlimited screenshots per scene. Unlimited amount of videos, sizes, speeds per scene.

Movies updates could also show direct links to the movie files for direct download. Preview an example below.

IATEST UPDATE

This is part two of the scene..and yo you got to peep this scene cause homegirl booty was SERIOUS!!!

bootyilike.com members area example.

Featured picture / movie set

- Show featured picture / movie sets
- New set is shown on a page refresh

Featured movie/picture is a must-have interactive element for the nowadays Paysites. Each item is shown randomly from the movie/picture categories each time a member refresh his browser page. Clicking a featured picture/movie will lead user directly to the content view page.

User can also click a gallery name to see the complete gallery where this exact item has been shown from.

Updates view

- Changeable items/age for the updates history
- Updates history is shown by pages (xx items per page)
- Upcoming updates calendar for next xxx days (7 default)
- Option to search in updates

## Changeable items/age for the updates history

You can define a period of time to show updates history for. By default, updates are shown separately for pictures/movies. You may want to shown them combined, if needed.

Updates history is shown by pages (xx items per page)

You can also specify amount of content items per updates history page to show updates by pages.

Upcoming updates calendar for next xxx days (7 default)

If you make manual content updates (content updates scheduling), you can publish an upcoming updates calendar in the members area or on tours. First page may feature a tiny calendar view like this:
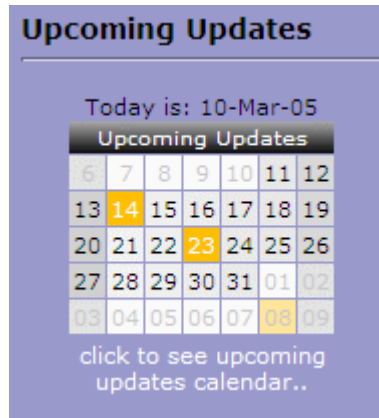

Days with updates planned are marked with Orange. You can change colors in the config.inc.php in your template directory. If you rollover your mouse to a day with planned update, the preview thumbnails for the planned galleries for updates will be shown:

If you rollover a day which is out of the current month (next month), the following message will be shown:
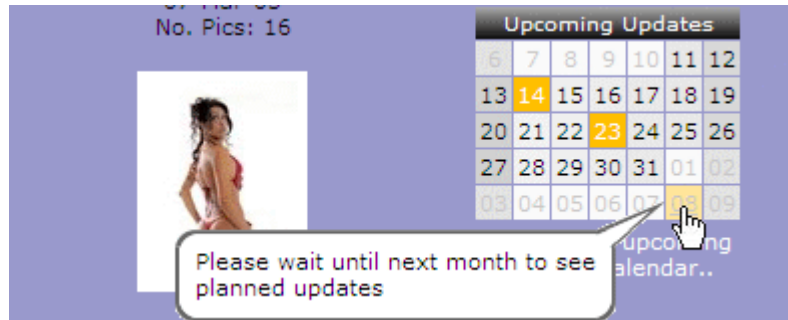

"Please wait until next month to see planned updates" (you can modify the text in the language files). That is made to prevent your members from canceling their membership if they know all upcoming updates. That keeps then joining again and motivating to make their membership prolongation for the next months.

A wide-screen, interactive calendar could be shown (after clicking a link above):

On a thumbnail rollover, more details will be shown:

The wide calendar could be opened in a new window.

Option to search in updates

If required, you can allow your members to search in updates. By default, this option is on with the standard design template packages.

Stories, combined view

- Show stories by categories and stories names/titles
- Attaching a story to any gallery will show them combined

Show stories by categories and stories names/titles

Easily publish stories by categories in your admin panel. Members can view stories the easiest way ever. Simply pick a category from the drop down menu and then click a story title from the list.

Sammy4u.com example:

Attaching a story to any gallery will show them combined

If you want to publish your galleries along with a story, you can simply attach a story to any gallery you want. That would be shown like this:

AdultWebware
AW v5.0
meeting your expectations since 2002
THE *EXPERIENCED* PAYSITE AUTOMATION
US & Canada toll-free: **+1.888.652.6939**

Interactivity

- Instant messenger with admin / paysite owner
- Interactive polls, poll results
- Content commenting
- Content voting, top content lists

Instant messenger with admin / Paysite owner

Give your members an ability to contact you and receive quick responses and they would love you for that! Fast and easily deliver your messages right at the member's screen. You can show your messenger on the first page to increate attention.

Or show banners/pop up windows if you need to draw your members' attention to the new unread messages they have from you.

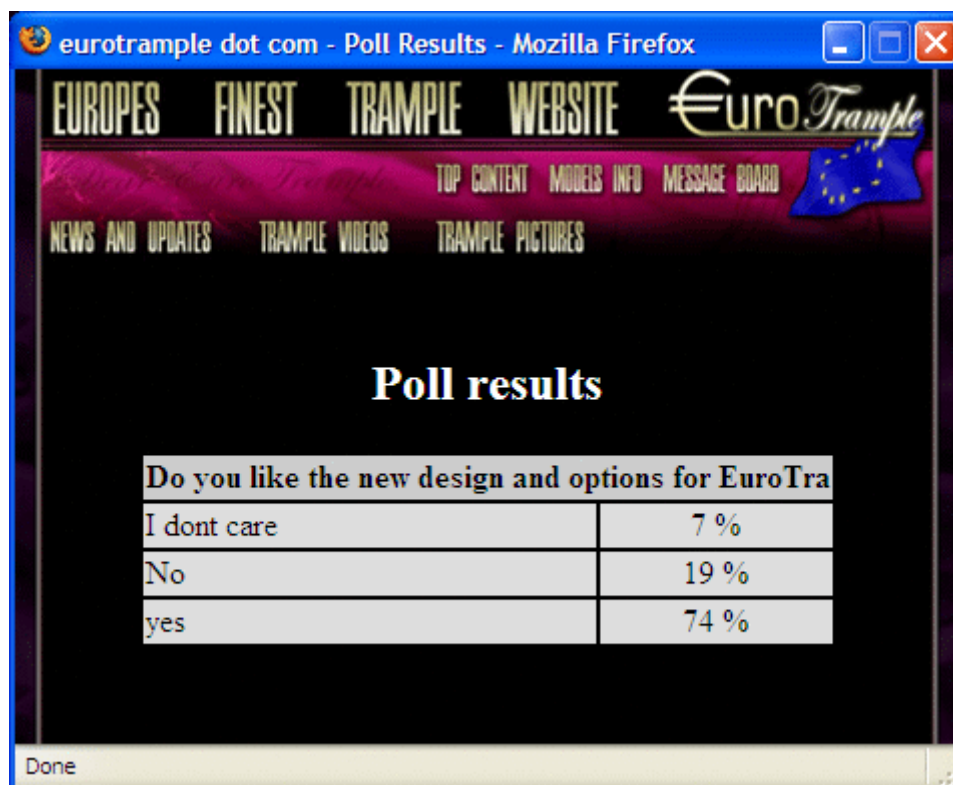

Interactive polls, poll results

Know what your members think or want to have or anything else you need to know. Knowledge will let you better understand your members' needs and feed them with content and service they really need.

You may want to show poll results to your members as well. Like this:

Content commenting

Each of your members can share their opinions on any published content items with other members. You can then see all of them in your admin interface and delete unnecessary ones easily.
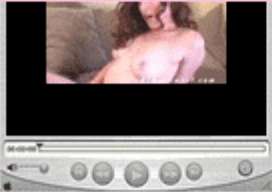

Content voting, top content lists

Each of your members can cast their vote per any content item you publish to them. Each vote will be counted to build top lists.

AimeeSweet's top content example.

You can also show top viewed content items (shown to members by default in the standard design templates packages). Example is shown below.

AdultWebware

meeting your expectations since 2002

Content search

- Free search, search results for pictures + movies
- Predefined search keywords (checkboxes)

Free search, search results for pictures + movies

Free search (user just type a word in the search box to start new search). Results are shown separately for pictures and movies for better understanding. Along with total search results amount. Any user can do as many searches as needed.

Predefined search keywords (checkboxes)

You can predefine keywords and specify in config.inc.php if you want pre-defined keywords shown in the members area. In that case user can simply check the boxes from list and hit search button to start their searches.

Niches with personal skins

- Niche-based content shown when niche mode is on
- Personal skin per niche shown (as set in the admin panel)

You can present your content by niches. Each niche may have its own design template. Members can select niche from a drop-down menu or you may want to show it as textual links in a row. Or any other way you require.

Content by episodes

- Each episode may contain videos in multiple formats
- Multiple download sizes, multiple screenshots
- Link to pictures, show category rating in stars, description

This features combination is very useful for episodes-based websites. Episodes could be shown based on specific content galleries structure or by keywords. We recommend using a galleries-structure based episodes for easier publishing.

Simply create movie galleries inside the movies category and attach pictures galleries, set descriptions to them etc. That could be easily presented in the members area design templates.

You can show episode's rating in stars per each episode.

Banners

- Show targeted banners in a gallery view
- Show banners in rotation through out the site

You can target banners by users preferences by attaching a banner group to any content category. That would show attached banners category in rotation during the user category/gallery viewing.

You can also show banners in rotation on the first page or at any other place. That is a great feature for free sites. Members area banners usage has shown just 0.05% overall views/clicks statistics.

Models catalogue

- Show models in alphabetical catalogue
- Featured model
- View model info
- Show plain list of models

Show models in alphabetical catalogue

All models which were added via Admin Panel could be presented in an alphabetical catalogue (default). Clicking each A..Z letter will show corresponding models which names begins with selected letter.

Featured model

It is possible to show featured model with all information anywhere on your Paysite. That shows random model.

View model info

Clicking a featured model or selecting a model from the a-b-c models catalogue will lead a member to the model information page. There he can see model's photo, models information, bio, other information and pictures/movies galleries the model is featured in.

View model info

You can also show plain list of models without separating them into catalogue. That list could be shown on the first page or anywhere else on Paysite.

Links to other sites, magazines, shops

- Show links to other sites, magazines, shops, etc with banners & descriptions

Publish links to the other (partners) sites, magazines, shops, or any other external content/plug-ins links the easiest way. Simply upload a banner picture in the admin panel and add a title & description to it. That would be published automatically like this:

Holio Feeds

   TONS of content for you here. All streaming videos, very high quality and in a large variety of niches for everyone to enjoy.

Homegrown Content

   Loads of extra high quality content here. All amateur style photos and video, includes webcam archives.

K Sex Radio

   Live Sex Talk Radio - Live pornstar hosted shows nightly. Unscripted sex talk radio. Hot pornstars and sexy DJ watch all the crazy antics that goes on in the K Sex studios!

Integration with tours

- Complete integration with tours (all front-end functionality available)
- Show latest updates on tours
- Show upcoming updates calendar on tours
- Publish general content statistics
- Publish news, banners
- Members area dynamic previews
- Free area with a stand-alone content*
- Anti-hotlinking protection

*Minor tuning required, please contact support team to set this option up for you during installation

Complete integration with tours (all front-end functionality available)

You can completely integrate your instance of AdultWebware with tours to publish anything you want. All the front-end functions which could be used in the protected members area, are available on the Paysite tours as well. You can automate any part of your Paysite. That is why AdultWebware is the first true COMPLETE Paysite Automation solution.

Show latest updates on tours

Publish updates history on tours to show that your Paysite is a highly updated one. You can use automated updates and all the generated updates will be shown on the tour pages as well.

You can specify for how many days to show updates history for. By default, updates are shown by the last 30 days. Thumbnails previews are shown for the top 10 updates only (default). You can change these settings in the config.inc.php configuration file.

Show upcoming updates calendar on tours

You can show upcoming updates calendar on your tours as well. That may feature a small calendar and a wide screen calendar. Keeping your potential members aware of how many updates are planned could be the best way to keep them attracted. And to show that you do completely open business to them.

Publish general content statistics

You can publish general content statistics by text (default) or use any combinations with images. Tour examples below shows how you can show the counters with images.
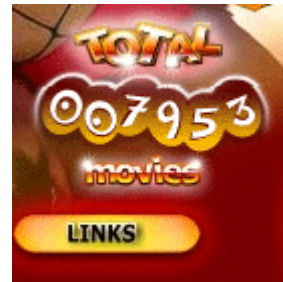

Publish news, banners

You can publish your news column with recent news and events.

Banners could be also shown on tours.

Members area dynamic previews

To increase signups, you can publish your protected members area preview for public on tours. The preview might feature all thumbnails for all content you have, or show just general categories – it is up to your preference. You can change that in the configuration file which comes with your standard design template in the external/ directory.

You can even allow potential members to use content search feature. All results will show thumbnails only. To access more, they need to signup.

Free area with a stand-alone content

You can also have a separate content published on the separate free area anywhere you want. Usually that is used for the free area to attract more visitors with free content.

Free area and any part of the tour may feature content search and any other features you want.

Any other combinations/suggestions are possible.

Anti-hotlinking protection

All content shown on tours and free area is hotlink-protected. Images are published securely. Paths to images are kept encrypted.

If you have any questions or suggestions how to improve this document, please send emails to support@adultwebware.com or use your V.I.P. support area at this url:

http://vip.adultwebware.com/

Thank you for your interest in AdultWebware, your complete Paysite automation.
BE proud of your Paysite! BE more successful with AdultWebware.
Spend less time on work – more time on pleasures.
