AdultWebware
we make you more efficient since 2002

AdultWebware v5.0 : Ways of use

There are almost unlimited ways of use for your AdultWebware v5.0 suite.
We tried to show you just the most common ones below.

We'd like to start with general benefits & possibilities first.

General free tours possibilities

The free tour is the show-scene for your Paysite. It should be as attractive as ever possible to invite new members for their membership signups.

With AdultWebware v5.0 the following general features on tours are available:

- Upcoming updates calendar
  - Small
  - Screen-wide
- Updates history, top xxx items or by pages
  - Top xxx items only
  - Show all updates by pages
  - Combined – top xxx with preview thumbnails,
    the other pages with links to signup only
- News and events
- Total content statistics
- Members area pictures preview
  - Full preview
  - General categories only
  - Any other methods
- Members area movies preview
- Free models catalogue
- Tours generator – create tours easily using templates
- Separate free area with separate content and other options possible

General members area possibilities

The members area is the heart and soul of any of your paysites. The better your members area is, the more recurring signups it produces. The more business you have. The more income you are keeping from month to month.

- Multiple design templates
- Increased Trial -> full membership conversions
  - With ability to divide your content on trial and full,
    you can show different content to trial and full members
  - Trial members can see full content as previews,
    clicking preview thumbnails will lead them to signup page
  - Trial members can not see full content (if you set that in Admin Panel)
- Pictures/movies/enhanced movies updates, search in updates
- Paysite news and events
- Upcoming updates calendar (small & wide-screen)
- Comfortable and powerful content view
- Featured picture / movie set
- Advanced (and enhanced) video content
- Stories, combined view with galleries
- Advanced content search
- Top notch interactivity
  - Polls, polls results
  - Content voting
  - Top voted/viewed content lists
  - Content commenting
  - Instant messenger with admin
- Niche-based content view with personal skin per niche
- Models catalogue
- Content view by episodes
- External links to partner sites, magazines, shops, plug-ins, etc
- Targeted, rotated banners

See how AdultWebware may help you if you have the following sites:

- Standard paysites
- Models sites
- Niches-based Paysites
- Episodes-based Paysites
- Video sites
- Exclusive content sites
- Free sites
- Mega-Paysites (include all the above)

Mini-sites

A mini-site can represent pictures, movies, external links & plug-ins, and the content search option. Latest updates & top voted/viewed content items, featured picture & movie.

Niches-based Paysite

A niches-based Paysite shows content per separate niches to members. All updates, top content items (top voted, top viewed), featured pictures and movies, pictures and movies – could be shown by specific niches.

To make it working simply define the niches, select design template per each template which should be used. Then go to your admin panel -> galleries and check the appropriate checkboxes (pick corresponding keywords per each gallery). Content will be shown by niches automatically.

If a design template was set per each niche, after making a niche selection from the members' area, user will see that specific niche with the new design template.

By default, the Mega-Paysite includes niches-based functionality. You can switch it on or off editing the configuration file.

Episodes-based Paysite

An Episodes-based Paysite shows content by episodes. Each episode may have personal movie gallery, pictures gallery, description (up to 5 descriptions), and a story.

Models site

Models-based site can start with a models catalogue on the first page. Clicking models faces members will see model's information, pictures, and movies. Blog module allows keeping personal blog inside the members area and drive members' attraction to it (members can post their messages & replies).

Alphabetical models catalogue is also accessible.

Video-sites

Video-sites provides an all-round support for video content of any nature. You can create video galleries with unlimited scenes, unlimited screenshots per scene and per video, unlimited download speeds and formats. Changeable preview thumbnails/screenshots per scene/movie. Preview movie possible. Simplified videos support as an option. Embedded video player. Links to direct downloads.

Exclusive content sites

For exclusive content sites you may need the top notch content publishing and updates scheduler. Per-user content rotation could dramatically reduce your workload and increase control for your Paysites content accessibility.

Standard Paysites

Standard Paysites include general features, such as:

- Pictures
- Movies
- Recent pictures/movies updates
- Featured picture/movie
- External links
- Content search (for pictures/movies)
- Instant messenger
- FAQ
- News
- Vote/rate for content
- Top voted/viewed content items

Free sites

Free sites could be useful for more potential members or special product buyers attraction. You can have separate AdultWebware install for your free area, or you can use it with any of your Paysites with AW. Each Multi-Domain site will also have ability to have personal free area. All the front-end functionality is available in the free area. Plus, all content shown is hotlink-secured. It is published with encrypted paths to images.

Mega-Paysite

This Mega-Paysite has almost everything your members may ever want to have. General idea is to show as much content of different kinds as ever possible.

Mega Paysite structure example:
